SYSTEMS ADMINISTRATION AND INFRASTRUCTURE SUPPORT

Multi-certified IT professional supporting Windows, macOS, and Linux environments, with experience in Active Directory, Microsoft 365, Exchange, networking, and endpoint security. Builds and administers Linux infrastructure and Azure-hosted projects using Docker, DNS, reverse proxies, TLS, and GitHub. Brings hands-on troubleshooting, clear documentation, and cross-team collaboration to systems administration and cloud support.

TECHNICAL SKILLS

Systems and cloud: Active Directory, Group Policy, Microsoft 365, Exchange, Microsoft Azure, Azure Static Web Apps, Windows, macOS, Linux, server virtualization

Networking and security: TCP/IP, DNS, DHCP, VLANs, VPNs, firewalls, DNSSEC, identity and access management, endpoint security, TLS/HTTPS, Wireshark

Infrastructure and tools: Docker, Docker Compose, Caddy, HAProxy, Portainer, AdGuard Home, Unbound, Git, GitHub, YAML, Hugo, CI/CD, NAS, SMB, Restic

PROFESSIONAL EXPERIENCE

IT Support Desk Specialist | The 20 | 2023–Present

- Administer Active Directory, Microsoft 365, and Exchange, managing user accounts, passwords, permissions, and Group Policy to support secure access.
- Provide support for Windows and macOS users, resolving hardware, software, authentication, and operating-system issues remotely and on site.
- Troubleshoot DNS, DHCP, VPN, VLAN, and TCP/IP connectivity; apply endpoint security and identity-management practices to protect client systems and data.
- Install and configure hardware and software, collaborate on escalated issues, and document incidents and resolutions in ticketing systems to support knowledge sharing.

SELECTED TECHNICAL PROJECTS

Azure Portfolio Website | Personal project

- Built and deployed a Hugo portfolio with GitHub and Azure Static Web Apps, using Git-based source control and CI/CD workflows for automated publishing.
- Configured custom-domain verification and public DNS records; managed YAML configuration, navigation, branding, and metadata.

Multi-Node Linux Homelab | Personal project

- Build and administer Raspberry Pi and Orange Pi systems running Docker Engine and Compose; manage containerized services with Portainer.
- Deployed redundant AdGuard Home and Unbound services for network-wide filtering, recursive DNS resolution, and DNSSEC validation.
- Configured Caddy and HAProxy for reverse proxying, TLS certificate management, and service routing; troubleshoot DNS, container connectivity, port exposure, and HTTP 502 errors.
- Implement Restic and NAS backup workflows to support recovery of homelab systems and application data.

PROFESSIONAL EXPERIENCE CONTINUED

Level One Analysis Customer Engineer | Computacenter | 2022

- Deployed enterprise laptops and supported Lenovo laptops, iPads, and MDM and cloud-enabled devices while maintaining service-level expectations.
- Resolved issues with Veeva, Concur, Salesforce, and other applications as an initial technical contact, prioritizing first-contact resolution.

System Technologist 2 | WatchGuard Video / Motorola Solutions | 2020–2021

- Troubleshoot body-camera and in-vehicle camera systems, wireless and cellular connectivity, cloud uploads, networks, workstations, and servers.
- Installed and maintained software across Windows and Linux; supported system updates, application beta testing, and server operations.
- Trained end users and collaborated across support tiers on high-priority incidents while handling sensitive law-enforcement and court-related information.

Classroom Technology Specialist | Columbia Advisory Group | 2019–2020

- Supported classroom computers and audiovisual systems in higher education, resolving hardware and software issues to minimize classroom disruption.
- Monitored equipment health, maintained asset and service records, and participated in planning and installing classroom technology.

Escalation Specialist | State Farm | 2013–2019

- Advanced from Customer Service Representative to Coordinator and Escalation Specialist; served as a subject-matter expert and trained representatives on systems, processes, and client onboarding.
- Coordinated escalations across departments, identified service trends with analysts, and maintained technology assets, software updates, and point-of-sale systems.

CERTIFICATIONS

CompTIA: Security+, Linux+, Server+, Network+, A+; Secure Infrastructure Specialist, Linux Network Professional, Network Infrastructure Professional, Systems Support Specialist

Microsoft: Azure Fundamentals (AZ-900), Azure AI Fundamentals (AI-900), Networking Fundamentals, Security Fundamentals, Server Fundamentals, Mobility and Device Fundamentals

Apple: Certified Support Professional

ISC²: Certified in Cybersecurity (CC)

Linux Professional Institute: Linux Essentials

Google: Cybersecurity Specialization

EDUCATION

Information Technology / System Administrator

MyComputerCareer | December 2019
